

DataGene publishes the Good Bulls Guide twice yearly to list top bulls from Australia and around the world. Australian Breeding Values are used to organise bulls by the most common breeding objectives. Dairy farmers can select bulls from the Good Bulls Guide with confidence that the information is independent and backed by strong science.

Using this guide is simple. Just choose your index:

- ✓ BPI that maximises profit through a balance of production, type and health traits
- ✓ HWI that fast tracks fertility, mastitis resistance and feed efficiency
- ✓ TWI that fast tracks type

When you see this icon, you can be assured that the bull has been independently evaluated and meets the requirements of the Good Bulls Guide.

Good Bulls Guide Notes

To be included, bulls must

- ✓ Be active with an ABV, ABV(i) or ABV(g)
- ✓ Meet minimum reliability requirements for ABV and ABV(i)
- ✓ Be amongst the best in their breed for Balanced Performance Index (BPI)

* Denotes an ABV that incorporates Australian data, all other traits for this bull are ABV(i)s using data from foreign daughters

Denotes an ABV(i) using data from foreign daughters
